## FRIENDSHIPS, FUN AND FREEDOM:

### A Real Mompreneur's Five Secrets To Making Money From Home

#### 1. The Purpose

Are you looking to make more money so you can have more money left over at the end of the month, or even SOME money left over at the end of the month?

Do you want to work from home to spend time with your children or spouse? Or do you simply want to pay off credit card debt once and for all?

Whatever you **WHY** is, you can use it to fuel you and keep you moving forward to reach your goals and dreams.

You *have* to have passion and purpose for starting a business because as you'll see in the next point, business is just not all about business It also provides many other things too.

On a personal level, it's about the people in your family, your spouse, children or family members who are need you to be happy so you can be the best you can be for them.

Yes, money is a powerful motivator, but being there for people is the thing that makes you take your business seriously. Wanting to be there for yourkids is one powerful motivator and it can be one of the main reasons people start a "work from home" business.

So ask yourself What is **my** Why? Without even asking, you may already know the answer as it's that thing that continues to gnaw at you day in, day out.

It maybe that you haven't a clue, so really take some time for this, sit quietly and let the answer come to you. If you are quiet enough you why will appear!

## **2. The People**

As I have mentioned, business is about people. When I was looking for an opportunity to work from home, I realized that I had to connect my passion with the people who I could serve through business.

When considering a work at home business, look for a company that has happy people who love what they do. My business allows me to work with friends and family who love and support me.

I am as well surrounded by leaders who help me and point me in the right direction. I get to work this business among people that I love and I get to share my excitement and accomplishments with them.

I don't know how I could be where I am today if I hadn't been working with the amazing people I call my friends. And, the countless number of customers who are always sharing their results from the products that we sell, it makes it all worth it!

## **3. The Product**

You won't share what you don't love. The fastest way to resenting a business opportunity is losing interest in the product. I knew the moment I put my product in somebody's hand or whichever part of the body ☺, I had chosen the right product, in reality the product actually found me! [You can read about it here.](#)

Think about *your* favorite products. You know, the one you shared with your friends in Facebook or snapped a picture of and sent it to your family member, or, the one you buy in bulk because you don't want them to run out. That's the feeling you should have about the company and the product you present.

## **4. The Plan**

I don't know about you, but I was tired of seeing work at home opportunities that were all game and NO Plan. I ran from anything that requires massive amounts of inventory, and I laughed at anything that cost ridiculous amount of money to join.

I didn't realize this when I started but it totally makes sense now, but having the company ship the product directly to my customers is a HUGE time and money saver, so think about that as well when you consider an opportunity.

Since we are all in the digital age, people are used to purchasing products online and were willing to wait for them. Easy for them. Easy for me. We ALL win.

## **5. The Paycheck**

Why did I save the money part for last? Well, as important as making money, I wouldn't dare try to lead you astray by making this seem like a get-rich-quick-scheme.

What I do so far from that, I run a serious business from home, where I am happy to say I make money several ways: I can sell the product at retail cost, as a distributor, I can potentially earn commissions,

and I have the privilege of leading a winning team of distributors for which the company will pay me handsome bonuses.

What you want is a way to make money that doesn't cost an arm and leg to get started and that works within your schedule. And you want to have fun while you do it. Fun is its own reward!

It would be a privilege and an honor to work with you! Let me know if and how I can help you determine if It Works! Business opportunity is right for you.

**More About It Works!**

A great quality product the customer just has to try it out and they will have to have it. This is how the Skinny Wrap works for us.

This company is not only known for their Skinny Wrap, but their other amazing products they have to offer for weight loss and getting healthy.

These products are becoming so well known that people are searching for ways to buy them or get started with the business. By getting involved with this company, you can be sure to have people ask you about the skinny wraps!

**Company Integrity**

It Works! is now debt free and rising fast. They are one of the fastest growing companies in the world today.

They have strong leaders and are constantly encouraging their team to rise to the top. They are regular people like you and me, who just so happened to come up with something amazing that works for everyone.

They participate in events that are help among the company so anyone from the It Works! Team can have the pleasure of interacting with them and become friends!

## About Annette

I've been scouring the Internet for a new product to review and trial on my [Weight Loss Mother](#) (WLM) site. As the site has readers from all around the globe it had a few criteria to meet.

The product had to be available everywhere, easily accessible, it had to work (of course) and be low cost. Big ask? For sure, however, read on and you'll see how this site came about.

So I started thinking as I was carrying out my research. Do we really have to flog ourselves to death sweating and puffing? Do we really want to count every calorie? Do we really want to make a warm shake on a hot day if cold and fresh water isn't available?

I came across this new innovation quite by accident; actually the body wraps found me! What I love about these body wraps is that they can be applied anywhere to your body that you would like to tighten, tone and firm.

This business is my own, very flexible and allows me to build sustainable monthly income. I set a goal for myself, dreamed big and with this simple business concept the company has in place, my income will grow beyond my wildest dreams.

Come join me for some Fun, Friendship & Freedom!
